

The ad network built for **conversations**, not pages

AI chatbot publishers — companion apps, vertical AI apps, chatbot builders — have millions of engaged daily users and ineffective monetization. Prism connects them to advertisers at the exact moment a user expresses purchase intent inside a conversation. No display ads. No banners. Context-matched editorial recommendations delivered natively in chat.

Stage	Pre-seed
Revenue	Pre-revenue
Market	Chatbot monetization
Model	Revenue share (70/30)

\$26B

US AI search ad market projected by 2029

(eMarketer)

5×

Higher CTR vs traditional display

in chatbot environments

+153%

CTR lift on in-chat ads vs search

(Microsoft Copilot tests)

\$5–15 CPM

Conversational AI ad rates

vs \$1–3 display average

THE PROBLEM

Publishers have audiences. They have ineffective monetization.

- ✗ Traditional display ads (banners) break conversation flow and destroy user trust
- ✗ General ad networks (Google AdSense) are built for pages, not conversational interfaces
- ✗ SaaS pricing requires charging users — unsustainable for free-tier companion apps
- ✗ B2C AI apps have 90+ min average sessions, high intent, zero revenue per session

THE SOLUTION

Intent-moment monetization native to conversation.

- ✓ Intent scoring detects purchase signals in conversation ("I need a good protein powder")
- ✓ Editorial-style recommendation injected as a natural chat message — not a banner
- ✓ Publisher keeps 70% of revenue. Webhook or SDK — no LLM model changes required
- ✓ Advertiser gets explicit, declared purchase intent — the highest-quality signal in digital advertising

COMPETITIVE LANDSCAPE

Company	Model	Chat-native	Indie publishers	Intent scoring
Koah	CPC/CPM/CPE in-chat	■	■	■
Dappier	Sponsored prompts + data	●	■	■

PRISM'S EDGE

Competitors target large platforms or enterprise chatbots. Prism targets the **independent B2C chatbot publisher** — companion apps, fitness AI, legal AI — with no existing ad partner and no engineering bandwidth. Our editorial recommendation format is designed to feel like content, not advertising, preserving the trust relationship that makes these apps valuable.

MARKET TIMING

AI chatbot ad market 2025	\$1.1B
Projected 2029 (eMarketer)	\$26B
OpenAI confirmed ads in ChatGPT	2025
MS Copilot CTR lift vs search	+153%
Est. indie B2C chatbot publishers	10,000+

THE ASK — \$200K PRE-SEED

Prism has a live website, a defined product architecture, and a scored pipeline of 23 B2C chatbot publisher targets. We are raising **\$200,000** to hire a full-time backend developer, fund go-to-market outreach, and provide founder salary through the first publisher and advertiser commitments.

BACKEND DEVELOPER (50%)

Full-time developer based in Israel. 20,000–30,000 NIS/month. Builds intent-scoring API, webhook infrastructure, publisher dashboard, and attribution tracking

GO-TO-MARKET (30%)

Publisher outreach, advertiser BD, and first campaign costs. Targets: Chai Research, Kindroid, Zing Coach, Chatbase, SiteGPT

FOUNDER SALARY (20%)

15,000 NIS/month. Allows founder full-time focus on product, partnerships, and first revenue milestone
